

Certificate of Y-chromosome Analysis

Participant: John Doe
Birth Date: 8/15/1955

Case Number: T0xxxxxx
Report Date: 11/3/2006

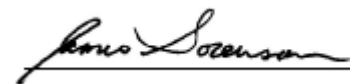

Explanation of Results:

Sorenson Genomics has analyzed the following genetic locations (loci) of the Y-chromosome to establish a haplotype for Reginald Pitchford. This haplotype is the set of tested loci and the observed allele value at each locus as shown in the table below. Testing was performed on your biological specimen using a process known as the Polymerase Chain Reaction (PCR).
