

September 22, 2022

Dear Mr. Creek,

This **Cherokee DNA Test** completes your order **D8550cm**. Any population names or terms highlighted in your PDF are clickable. You can follow the links to get more information.

May we suggest that you upgrade to the full Native American DNA Fingerprint Plus for more information? You may do so now at a discount by ordering our [Premium Upgrade](#). There is no need to resample. This includes your top 50 specific world and top 20 European populations, a map highlighting your ancestry, your megapopulations, and an individualized analysis. Check out FAQs about the DNA Fingerprint Test on the website. Remember, getting your results is just the beginning of a lifelong learning process. The state of DNA science is always progressing!

Now that you know your DNA Fingerprint Results you may wish to visit [DNA Ancestor Communities](#). Here you can meet others from the same corner of the world, upload pictures, post family stories and genealogies and follow one or more discussions in several different forums, including World, Europe, Melungeon, Cherokee and Jewish. It's free, so join today!

We hope you enjoy your report for years to come and thank you for entrusting us with your DNA testing needs. [Certificates](#) are available for any result named in your report, along with a large selection of [books](#) to help you pursue your interests. Remember you have a 10% discount on any future orders with the code **dnaplus**. This discount never expires, and you can pass it on to family and friends.

We love reviews and referrals! Customer reviews are the lifeblood of a small, innovative company like ours. Here are some links for your convenience-

Or if you prefer, leave us a [Google Review](#) or comments on our website <https://dnaconsultants.com/testimonials/>

Best Regards,

**Sue**

Susan Levin

## John Creek

### Cherokee DNA Test

Cxxxx - 800xxxxx

#### Our Process

Your [unique genetic profile](#) was compared with STR frequencies for more than 520 reference populations from around the world stored in our computer program [atDNA 10.4](#). Your strongest Native American matches on a global basis appear below in **red**, together with their overall rank. DNA Consultants' database contains nearly 70 Native American reference populations. These may be specific tribes such as Apache or Cherokee, or they may be states, regions, or countries. The n-number (n=109, n=228, etc.) reflects the number of participants in the sample used to represent the population in the published study. For more information, links and representative examples of any given ancestry, click on the linked population or see [All Populations](#).

Rank	World Population Matches
1	<a href="#">Russia - Vody (n = 60)</a>
2	<a href="#">Colombian - Bogata (n = 150)</a>
3	<a href="#">Lithuania (n = 300)</a>
4	<a href="#">Costa Rican (n = 260)</a>
5	<a href="#">Polish (n = 870)</a>
6	<a href="#">Russia - Saratov (n = 52)</a>
7	<a href="#">Belarusian - Northeastern Poland (n = 212)</a>
8	<b><a href="#">U.S. Shawnee Admixed (n = 53)</a></b>
9	<a href="#">Russian (n = 402)</a>
10	<a href="#">Russia - Oryol (n = 72)</a>
11	<a href="#">Belarusian (n = 176)</a>
12	<a href="#">Slovak - Presov (n = 276)</a>
13	<a href="#">Poland - Lodz (n = 1000)</a>
14	<a href="#">Polish - Southeastern (n = 714)</a>
15	<a href="#">Russia - Belgorod (n = 66)</a>
16	<a href="#">Malaysian - Malay (n = 210)</a>
17	<a href="#">Hispanic - Minnesota (n = 75)</a>
18	<a href="#">Colombian (n = 1944)</a>
19	<a href="#">Madagascar (n=67)</a>
20	<a href="#">Polish - Northern (n = 145)</a>
21	<a href="#">Ukrainian (n = 900)</a>
22	<a href="#">Lithuania - Vilnius (n = 140)</a>

23	Hispanic - Minnesota (n = 151)
24	Korean - Western U.S. (n = 63)
25	Romanian - Transylvanian - Csango (n = 220)
26	Polish (n = 125)
27	Polish (n = 412)
28	Indonesian - Java (n = 105)
29	Russia - Tuva (n = 80)
30	British
31	Hispanic - Minnesota (n = 191)
32	Czech (n = 1141)
33	Argentinian - Buenos Aires (n = 101)
34	Turkish (n = 198)
35	New Zealand Asian (n = 1006)
36	Macedonian (n = 100)
37	India - Tripuri (n = 65)
38	Romanian - Transylvanian - Szekler (n = 257)
39	Colombian-Andean-Amazonian-Orinoquian (n = 846)
40	Belgian - Flanders (Dutch) (n = 222)
41	Polish - Podlasie (n = 842)
42	Polish - Central (n = 430)
43	Japanese - Eastern U.S. (n = 79)
44	Slovakia – Saris (n=848)
45	White - California (n = 75)
46	Austrian - Salzburg Region (n = 194)
47	India - Gond (n = 75)
48	Mongolia - Ulaanbaatar - Mara (n = 90)
49	Asian - Northern Australian (n = 225)
50	Hungarian (n = 4213)
76	U.S. Cherokee Admixed (n=92)
143	U.S. Cherokee Admixed (n=62)
362	U.S. Cherokee Enrolled (n=33)

**Results**

As can be seen, U.S. Cherokee Admixed (n=92) appears as match #76. U.S. Cherokee Admixed (n=62) is farther down, at #143. U.S. Cherokee Enrolled (n=33) is below, at #362. Two other Native American populations also appear in your top matches, as highlighted above.

**Based on your results, it is thus likely you have significant amounts of Cherokee ancestry.**

A Cherokee Certificate is provided at the end of this report.

## Technical Notes

Genetic systems known as **autosomal** markers were analyzed at our accredited testing laboratory. The table below shows you how your unique **DNA fingerprint** or lab results look. The numbers (alleles) reflect your genetic inheritance from all previous generations and produce a picture of your overall ancestry and ethnicity when run in our computer program **atDNA 10.4**. Your alleles from both parents are fully represented on the chart, although it is not possible to determine which allele on each line came from which parent. Locus is the location on the chromosome for these alleles, also known as STRs, or **Short Tandem Repeats**.

## Your Genetic Profile

<i>Locus</i>	<i>Alleles</i>		<i>Typical Range</i>
D8S1179	11	15	7 - 24
D21S11	32.2	33.2	12 - 41.2
D7S820	11	11	5 - 17
CSFIPO	10	12	6 - 18
D3S1358	14	17	9 - 21.1
THO1	6	9.3	4 - 13.3
D13S317	10	12	5 - 17
D16S539	11	12	4 - 20
D2S1338	20	24	10 - 28
D19S433	14	15.2	9 - 19.2
VWA	16	18	8 - 24
TPOX	8	11	5 - 16
D18S51	12	18	7 - 31
D5S818	11	11	6 - 17
FGA	21	22	6 - 48.2

Use the special promo code **dnaplus** to receive a 10% discount on the Plus or on any other DNA test we offer. There is no need to be re-sampled; we retain your lab results on file and your report will be delivered within 14 days. This discount never expires and may be passed on to family members and friends.

We encourage you to join the Cherokee Forum at **DNA Communities**, where you can share your results and genealogy and meet others interested in their ancestry. It's fun, free and informative. Please also visit the Cherokee/Native American information page at DNA Consultants- <https://dnaconsultants.com/cherokee-1/>.

## Understanding Your Cherokee Results

### Key to Rank or Significance

**Very Significant** On a combined basis, the ancestry you received from both parents includes a strong indication of ancestry matching other people of reported American Indian genetic ancestry. Although this result cannot be translated into a percentage of ancestry, you rank in the top echelon of scores for having strong matches showing American Indian ancestry.

**Significant** On a combined basis, the ancestry you received equally from both parents includes a significant amount of ancestry matching other people of reported American Indian ancestry. You rank in the next highest echelon of scores for having American Indian ancestry.

**Somewhat Significant** Your combined ancestry indicates moderate matches with people of reported American Indian ancestry.

**Insignificant** Your combined ancestry shows low or no matches with people of reported American Indian ancestry, other than possibly your ethnic marker results.

**N.L. (Cannot be compared or Non Liquefied)** Your DNA profile does not fit within the parameters of the samples of one or more of our Cherokee populations (U.S. Cherokee Admixed (n=62), U.S. Cherokee Admixed (n=92), or U.S. Cherokee Enrolled (n=33) and cannot therefore be compared. No result is possible. One or more of the 30 alleles in your STR profile is *not* reported in these population samples, the only ones available. Uncertain.

### FAQs: Reasons Why Your Match Was Unexpectedly Low or High

- Your Cherokee ancestors are very far removed or are too weak to register statistically. As a sample computation, if your great-grandmother was a half-blood Cherokee, you are 1/16 or 6¼ percent Cherokee. She was born in the 19<sup>th</sup> century. If you have but a single Cherokee line, it can become weak after a few generations. Very small degrees of admixture cannot be detected.
- A family tradition may have reported Cherokee when other tribes were more dominant. Historically, many Native groups were extinguished, or blended together with other tribes, especially with the very numerous and welcoming Cherokee. Today, Cherokee is the most often named Native affiliation of Americans.
- Although you may indeed carry significant Cherokee heritage, our samples (the only known representations of Cherokee DNA) are insufficient for all situations. They are based on 62 and 92 admixed people in 2012 and 2017 inhouse studies and 33 enrolled Cherokees reported in a 2016 study (Kanthaswamy et al.). While such small sample sizes may suffice for an exotic, highly distinctive population, it may not be valid the Cherokee, who are turning out to be of greater than expected diversity.

### Specific Disclaimers

This DNA Test is a probabilistic prediction of ancestry for personal knowledge only. It is a non-chain of custody form of testing and is not intended for legal or official purposes. Its results may or may not confirm expected ethnic composition, family history or genealogical determinations. Alone, it may not be used to prove identity, biological relationships, nationality, citizenship, immigration, or tribal enrollment.

Not all Native American (indigenous) tribes or tribal regions are represented in the comparisons. We strive to include every group that has been reported in worldwide forensic testing. If the results are not as expected, the case may be that the subject's particular ancestry is not able to be included for comparison.

All populations are mixed; none is pure. Hence, no percentage can be assigned to any individual's ancestry on a genetic basis. For scientific as well as ethical reasons, DNA Consultants refrains from giving results expressed in figures like estimated percentages or proportions of ethnicity.

### Did You Know?

- The following accessory lineages have been identified in people of Cherokee descent in addition to other Native American populations: Armenian, Berber (Moroccan), Egyptian, Turkish, Greek, Spanish/Portuguese, Melungeon, Mayan, Polynesian, Romani/Gypsy and Jewish.
  - The name Cherokee (Tsalagi) has a disputed origin and meaning.
  - The Cherokee language may not be very old.
- Although the Cherokee are the most populous Indian Nation, they are the least studied.
